

Now you can back-up and store key recovery files, and collaborate online with employees or partners on planning and operational documents.

Unleash the power of remote secure back-up, single user and group sharing – while storing a complete building or operations recovery plan – in the event a facility or building is lost due to fire, flood or other events.

W.A.R.N. Vault answers your Continuity of Government (COG) and Continuity of Operations (COOP) requirements for document management and recovery.

W.A.R.N. Vault gives you dual remote permission-based storage and access to key documents like building and recovery plans, EOC library and action plan data, drawings, maps, contact lists and more, available instantly.

Now you have a totally new way to leverage your secure WARN web access for your COOP and COG plans, by adding remote live storage for recovery files.

Now you can store all critical files, all in one place, and always have them at your fingertips. Share files effortlessly with your team, associates, and other partners or agencies. With W.A.R.N. Vault, there are no more disks, no more unreliable copies, and no more file or access compatibility problems when you are away from work.

W.A.R.N. Vault gives you a host of features to allow for file storage, transfer, access, collaboration, back-up, security, viewing and access by mobile phone, all without bandwidth limitations.

With highly customizable features and a web permission-based console for sharing and collaborating with others, you can share photos, text, images and slideshows – and allow for commenting or editing and re-publication to the Vault -- any time of the day or night.

Online Document Viewer - Open any MS Office document, PDF and other file formats directly online! Share files with anyone - your email recipients just click to view your files in the Online Viewer, with no account needed.

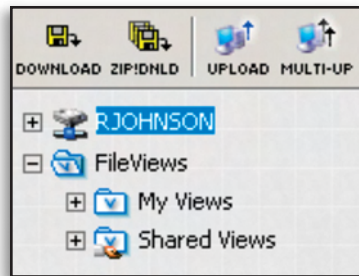

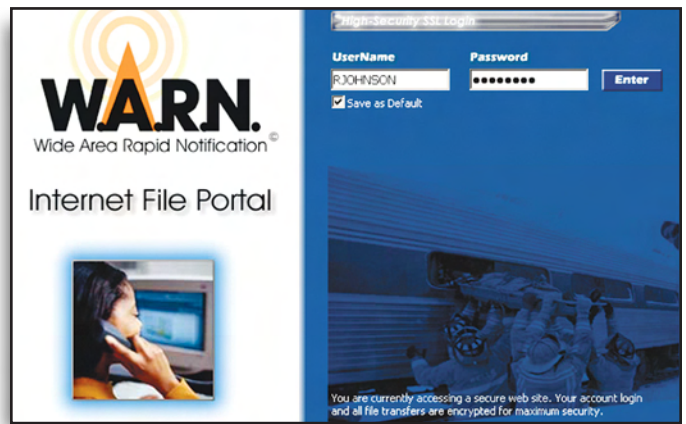

Windows Mobile Devices - Now access files on the road or anywhere at all with your Windows Mobile phone or Blackberry device. Simply go to the web on your hand-held or wireless to open a WebFolder link for your account.

Email WARN Vault Files Anywhere - Now email files directly to your W.A.R.N. Vault account. Email attachments can be directed to specific folders using keywords in the Subject Line, or just go to an Inbound Email folder for later.

Backup Windows Service - Logoff your PC and run unattended backups as a Windows Service. This feature is ideal for servers, and any PC can benefit by running backups jobs independent of the Windows login.
